Our Vision

To enable the use of accessible and affordable
assistive solutions and improve the lives of
millions in need

Leading Team

Moran Ran, Founder, CEO - Moran holds an MA in rehabilitation neuropsychology. Since 2016, she serves as the CEO of Atvisor. Since 2018, she serves as a co-chair of the rehabilitation psychology division of the Israeli Psychology Association. From 2007 to 2017, Moran worked at the Israeli National Institute for the Rehabilitation of the Brain Injured, where she headed the assessment unit. She is involved in assistive technology research in the fields of policy making, assistive technology use and impact outcomes and digital transformation.

Ronit Ran, Founder, CTO - Ronit holds BA in Computer Science and MA in Conflict Resolution. Since 2016, she served as the CTO of Atvisor. Ronit gained vast experience in algorithmic development, product development and projects management. From 2000 to 2010 she worked in “Music Genome” and from 2011-2016 as a freelancer. Ronit initiated and managed a social project “art of the project” for the empowerment of artists with Asperger Syndrome.

Avi Sharir, Leading Investor - Avi Sharir is Founder of 3D Innotech, with a rich technological and entrepreneurial background. Avi served at senior positions in several technology groups, such as Tadiran Communications group and Orbothech. In 1993, Avi founded Orad Hi Tech Systems, a leading provider of real-time 3D Broadcast solutions. Avi had two exits including Orad Hi-Tec Systems Ltd. Avi Sharir graduated from the Technion Israel Institute of Technology in Haifa.

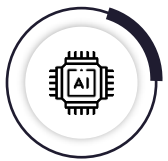

David Banes, Advisory board - David Banes is Director of David Banes Access and Inclusion Services and was formerly CEO, at the Qatar Assistive Technology Center. Throughout his career, he has been responsible for developing services to ensure that people with disability are digitally included. David is senior adviser to countries and organizations such as the world health organization, UNICEF and many others, addressing all aspects of access and inclusion through disability.

Atvisor in a Glance

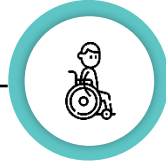

Atvisor is a groundbreaking digital health platform that matches the right assistive technology to individuals in need.

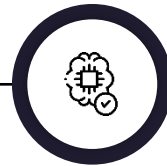

Our platform uses AI and over **50** years of accumulated knowledge to accurately connect the right solution from an endless base of services, products, and smart environments.

2 Billion people need AT

New assistive technologies are more available today than ever.

Life changing assistive technologies are largely inaccessible to vast parts of the population – older people, people with physical, mental, and cognitive difficulties in all severities, ages, and life domains.

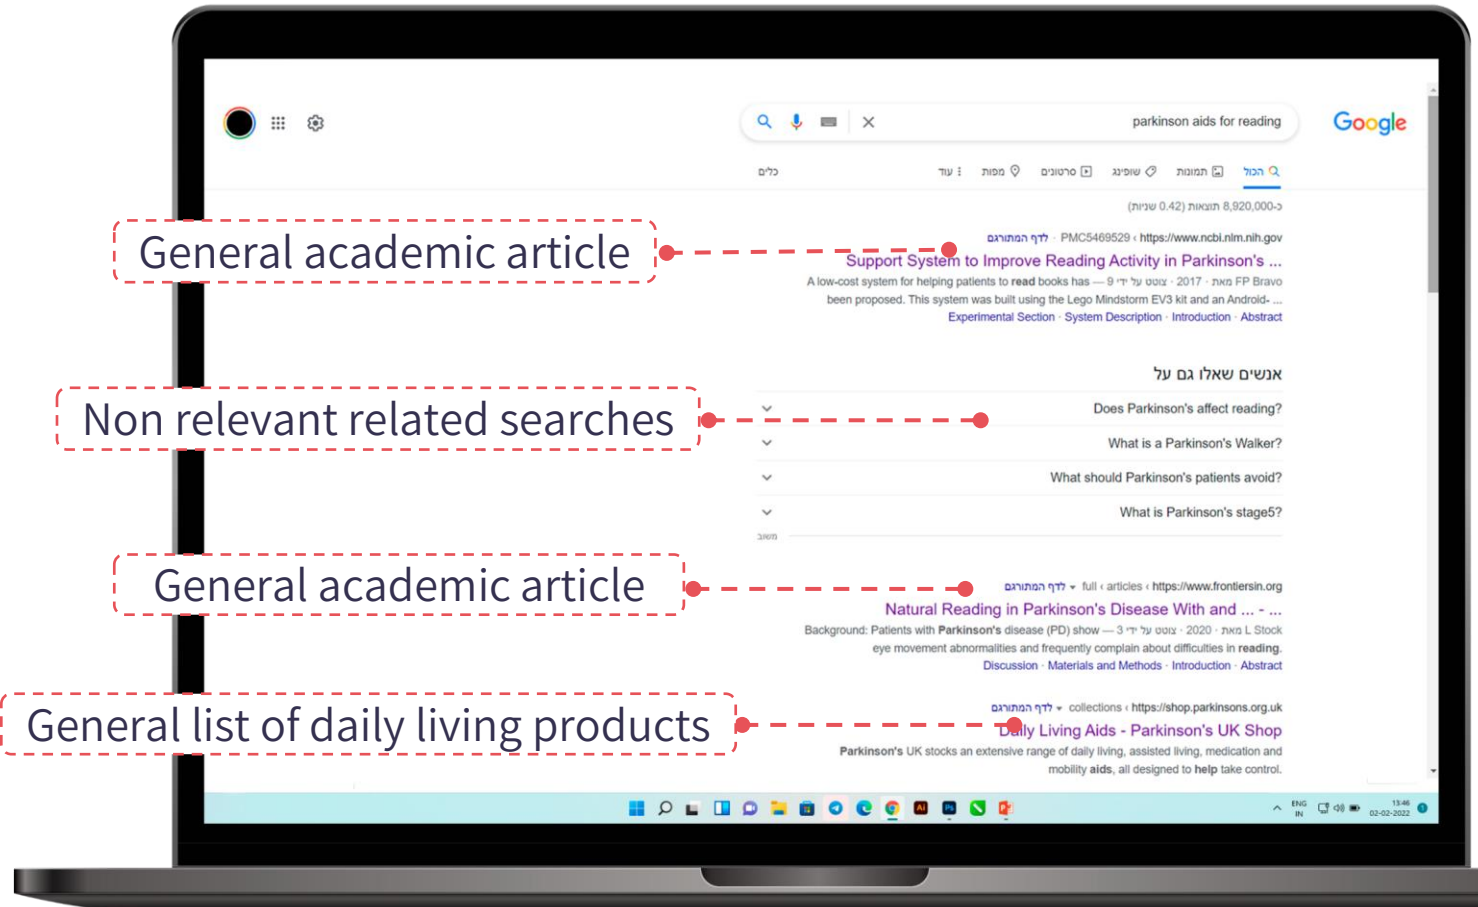

Yet, only lucky few (**10%**) benefits from it due to lack of access to technology, expert advice, and funding

What can you find in a Google search?

Gordon Levy, 81, diagnosed with early-stage Parkinson, dealing with vision difficulties, tremor in his right arm and muscle weakness on both hands. His daughter Jane is looking for products that will assist him with his reading.

Our Solution - Atvisor

The first solution that connects the AT market to personal needs

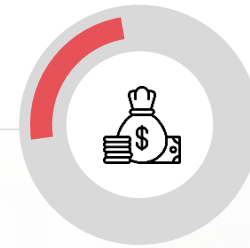

Access to Technology

Our AI engine constantly aggregates information and solutions – moving from fragmented markets into a one focal point of access

Expert Advice

Based on a clinical personal profile, our platform automatically matches every specific need to the right solution and expert advice

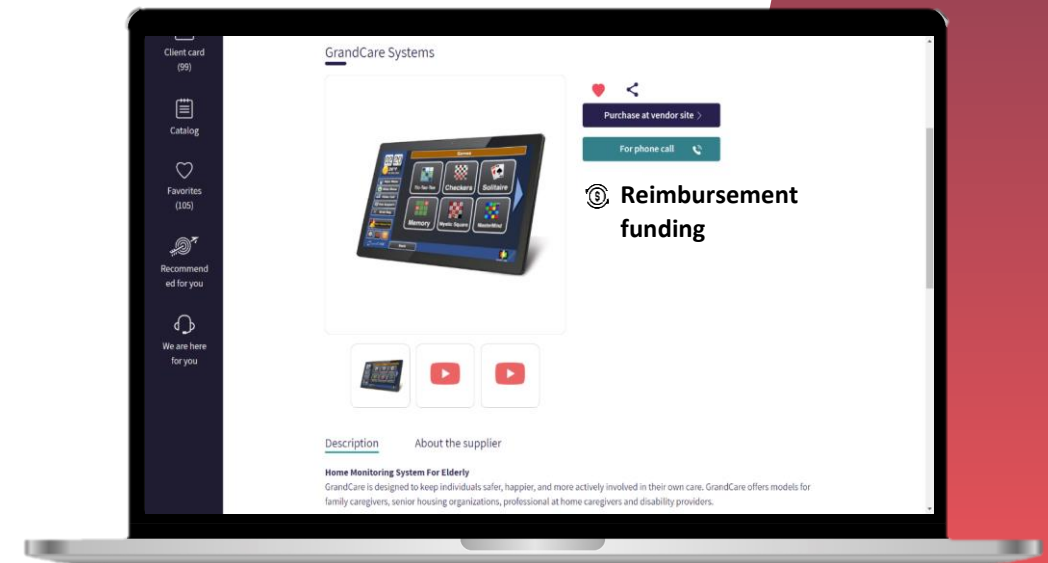

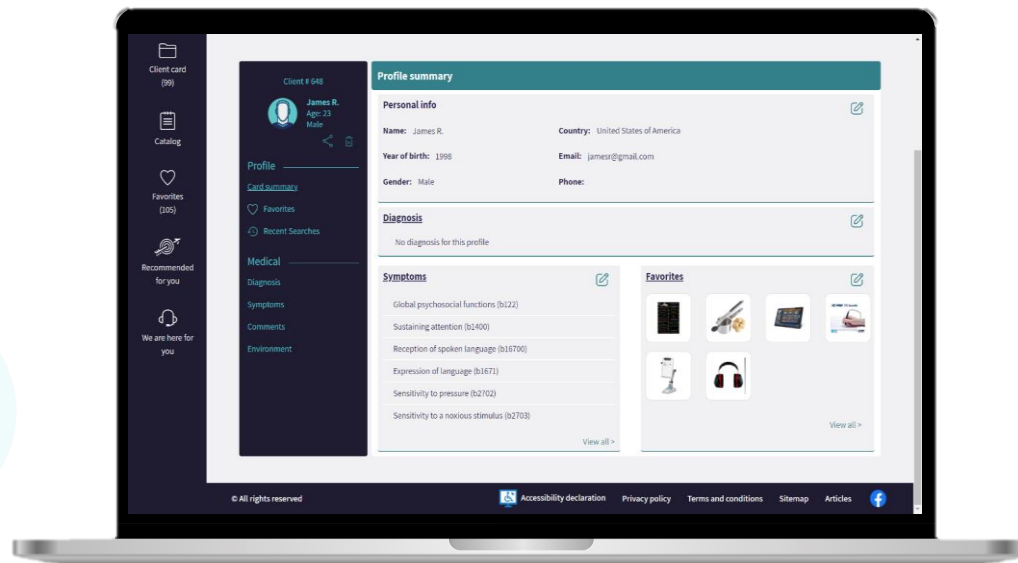

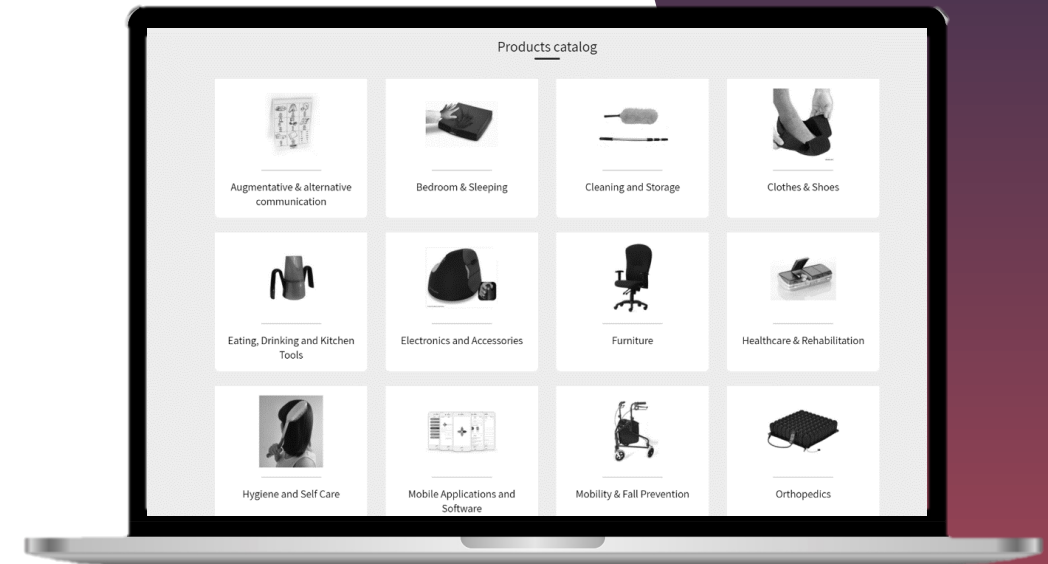

Funding Management

Pending on a specific solution, our platform will allocate and manage the process of reimbursement and funding channels to allow maximum support in provision

System Flow

-  Create a personal clinical profile
-  Get personal recommendations for products & services
-  Manage decision making with an expert or independently
-  Buy the item and get online governmental funding

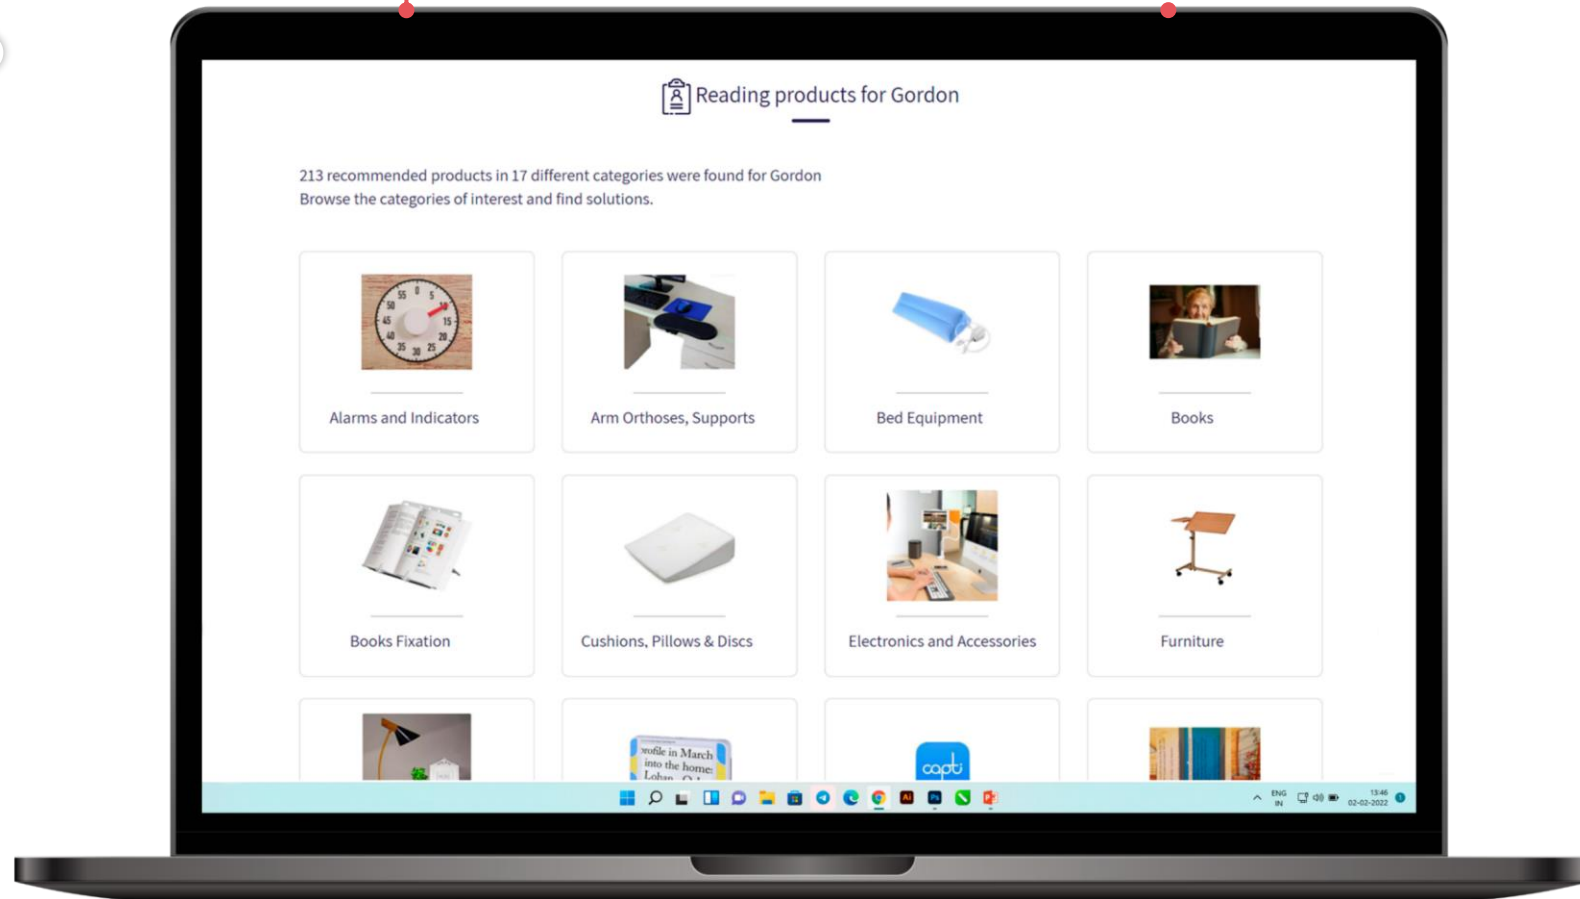

What can Gordon find using Atvisor?

- › Personalized service
- › 360 approach
- › Time saving
- › Full Journey
- › Opening the market
- › Adapts with changing condition of the client

213 relevant products from 17 commercial categories enabling reading

all products matching Gordon's clinical profile and functional goals

Our Innovation

A closed cycle of aggregating, analyzing and matching AT

Data Aggregation

- Suppliers' websites
- Gov API & websites
- WHO – ICF* - functioning
- WHO - ICD** – diagnosis

**Clinical WHO taxonomies to describe disabilities and elderly possible conditions

Knowledge Representation

Layered Structured Dynamic Database

- Products specifications
- Funding and services
- Clinical Profiles

Big Data Analysis

Statistics and insights for:

- End-users
- AT Professionals
- Suppliers
- Insurance companies
- Governments

AI & Full Automation

Target Market – North America

North America dominated the market in 2018, accounting for the highest market share, and is anticipated to maintain this trend throughout the forecast period.

Global Market

Global elderly and disabled assistive devices market size:

2018 - 23 \$Billion

2026 – 35 \$Billion

How do we Scale

Reaching Consumers

B2G & B2B Partnerships

Working with large-scale players generates organic growth of end-users' traction

Focus for years 2023-2024:

7.3 M people with IDD

40 M elderly

Adding Products

900 Suppliers DB

Commercial asset of 900 nationwide supplier's database to be activated upon market entry

Focus for years 2023-2024:

Daily living products (35% of the market)

Smart Homes and Digital AT

Working with a Local Agent

Disability Cocoon

Technology hub, working with AT suppliers, experts, and disability related units

Focus for years 2023-2024:

Joint project with Washington DC

AT experts training program

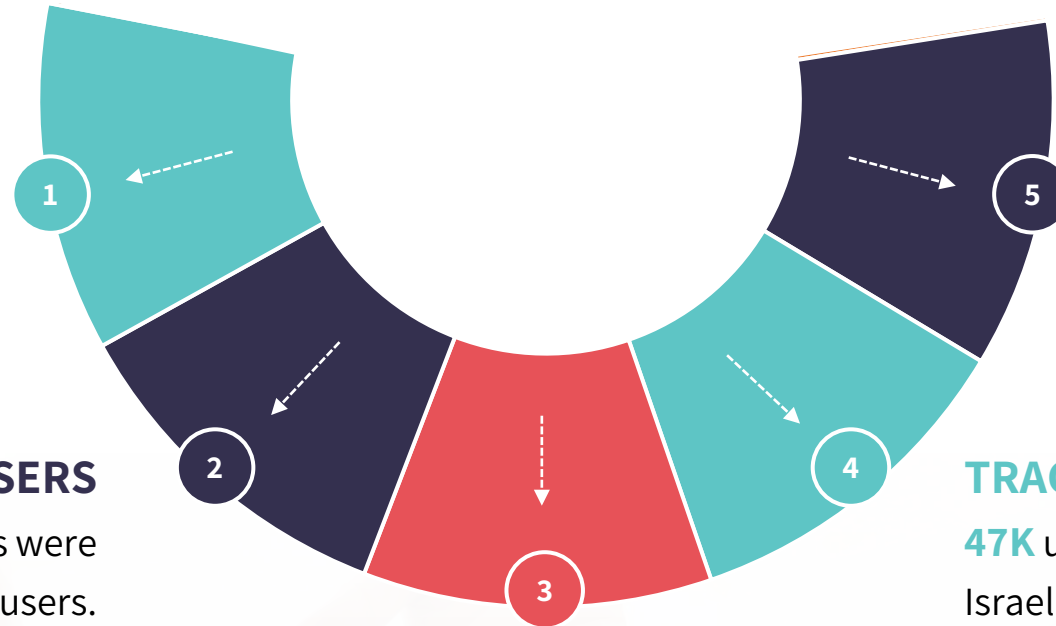

Current Status

OUR PARTNERS

Strategic partnership with
Governmental ministries -
Welfare, Health, Employment,
Education and more

LISTED USERS

More than **1000** clinical profiles were
created by professionals and end users.

B2B REVENUE

In 2022 **\$170K** revenue.
In 2023, 3 B2G contracts, US state
contract in progress – **\$6.2 M**

TRACTION

47K users visited the website, mainly from
Israel and the US (organic growth)

LEADS

In 2022 **101K** product pages views.
In March 2023 payment options available.

- “Personal Budget” program – JDC – connecting needs to open market services (3/23)
- “Tech First” program – Washington DC – first US pilot for a digital AT service for people with disabilities (8/23)

Suited Assistive Technology Changes People's Lives

“

I attendant your lecture at the OT conference yesterday, and since then I have already started using the platform, created profiles for my clients and recommended assistive technologies from them. I must tell everyone in our rehabilitation center about you. They must know this wonderful thing. *Lili, Occupational Therapist.*

I have a lot of anxieties, one of them is to go outside and take the bus when it is full of people. I started using Kalmigo, 3 months ago and it lowers my anxiety. It is small and easy to take everywhere. I use it 3 times a day, it helps me to go outside and fall a sleep easily, sometimes more sometimes less but it always helps me.

”
